Whirlpool components

ČOV dispenser versus aggressive solution

ČOV dispenser is primarily determined for dosage of non-agresive solution. User is obliged to make an exchange of joining elements and tubes in regular intervals. This warning is published on basis of fact that the e supplier does not know the exact nature of solution and its agresion towards other materials, that the the final user will dose.

Waterproof adjustable dosing of solution is device designed for automatic dosing of various chemicals such as ferric sulfate in wastewater treatment plants. The advantage is the possibility of placing a wet environment. Set the desired daily dose is done on the switch inside the device. Dispenser must be closed after setting or sealed and thereby it is prevented of interference in setting an unauthorized person. The first dose is after connecting the power supply - it is also a functional check device.

- IP-66
- dosing peristaltic pump 230V/50 Hz
- adjustable daily dose 25-1600 ml
- daily dosing interval after 4 hours
