

## Electronics U1TI - replaces V1TI

Electronics U1TI a modified version of the software is designed to control one electric device using of piezoelectric button with backlight. Press of the button you can to turn of electrical equipment, eg. pool attraction , hydromassage , etc. for 25 minutes. Advantage is that the electronics can be easily reprogrammed according to customer's requirement. Novelty is that the output can be connected in two ways:

- 1) jumpers I-2 are connected - output is 230V max. load 8A.
- 2) jumpers I-2 are not connected - output can be used as volt free switching contact max. load 8A.

Benefits are also four possible connections of piezoelectric button, see below.

Note: Electronics V1TI is no longer manufactured.

### Switch No. 1, setting way of indication

OFF= if is turned off - the button backlight not lit , if is turned on - the button backlight lit

ON = if is turned off - the button backlight t lit , if is turned on - the button backlight flashes

### Switch No. 2, setting way of control

OFF= turn on and turn off is done by one pressing the button

ON = turn on and turn off twice pressing of button in quick succession, this connection is for placement of button in difficult operating conditions eg. under water, on the edge of the pool, rapid changes in ambient temperature

### Reliable product, troublefree service.

code	Description	
120033	Electronic control panel U1TI	79.55 €
123063	Stainless steel piezoelectric momentary switch flat, green	31.68 €
123065	Stainless steel piezoelectric momentary switch flat, white	31.68 €-
123062	Stainless steel piezoelectric momentary switch flat, blue	31.68 €
123064	Stainless steel piezoelectric momentary switch flat, red	31.68 €
