Whirlpool components

Electronic control panel U56T with the program Scottish showers

Scottish showers (alternation of hot and cold water) is a popular spa treatment, which promotes blood circulation and strengthens the resistance of human organism.
Electronic control automatically manages this procedure the following way: hot and cold water is running alternately for 15 seconds by pressing of the piezo button. This cycle is repeated 2 minutes. The whole cycle is repeated again by pressing the piezo button. This the program can be adapted to the specific customer requirements.

Areliable product, troublefree service.
