

Steam generator 3 - 18 kW

Steam bath in the privacy of your home...

Our current offer of the steam generators has been extended for the new types for middle and big steam rooms. Steam generators are convenient for implementation of saunas for home and public use like flats, houses, schools, garden nurseries, hotels, wellness centers and so on. The installation of the steam generator is very easy. The goods supply contains all components needed for the implementation of the steam generator: steam generator, controlling electronics, controlling digital panel, connecting cables, steam outlet, light*. Model 3kW is equipped with radio and ventilator and all that is controlled by very modern controlling panel.
