

Brass handle "SYMMETRIC"

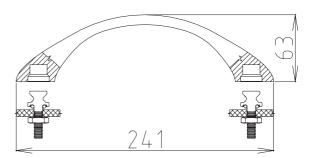

New luxurious brass handle with functional design for easy replacement

- ■Luxurious design
- ■Easy replacement
- High mechanical properties

Our current offer of the bath-tub handles has been extended for brand new brass handle with the chrome surface design. The biggest advantage of the handle "SYMMETRIC" is its way of bath-tub fixation, where the anchoring stainless steel bolts are anchored on the bath-tub and the handle itself can be easily attached or removed by an imbus key from the bathing area of the bath-tub. Thanks to this technical solution the replacement of the handle is very easy and there is no need of access to the area behind the bath-tub like with the common handles.

Beside this advantage, the handle is also very modern and elegant and its design will glamorize every bath-tub...
