

Interface BS7

Interface BS7 with the possibility of connecting 7 buttons

Interface BS7 services to signal transmission from the contactless sensor (HLS) into the electronic for the realisation of buttonless control S-Touch. In comparison with existing version BS5 (5 sensors/5 controlling positions), BS7 offers connection of 7 sensors (7 controlling positions = „buttons”). Thanks to interface BS7 the buttonless control S-Touch can be now realized with 7 functions, e.g.:

- light
- air massage
- air massage regulation +
- air massage regulation -
- water massage
- heating
- StreamClean
