

## Interface BS7 replaces interface BS5

Interface BS7 with the possibility of connecting 7 buttons!

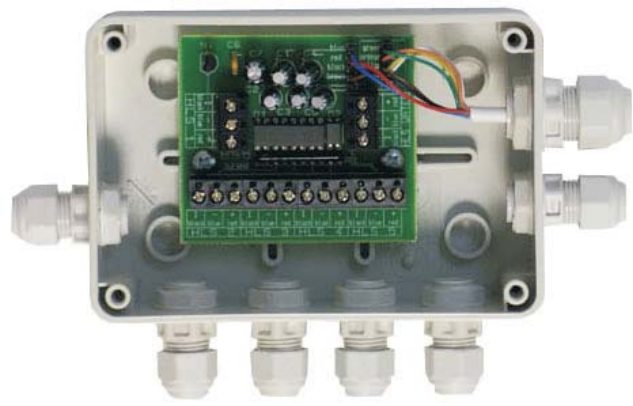

Interface BS7 services to signal transmission from the contactless sensor (HLS) into the electronic for the realisation of button-less electronic control S-Touch. Interface BS7 is replacing the older version of interface BS5. In comparison with BS5 version, the new type BS7 offers connection of 7 buttons (7 control positions = "buttons"). With the old version BS5 it was possible to connect only 5 buttons.

Thanks to interface BS7, the button-less electronic control S-Touch can be now realized with 7 functions, e.g.:

- light
- air massage
- air massage regulation +
- air massage regulation -
- water massage
- heating
- StreamClean
