

## CoolLight 5W LED module

We come with innovated version of white light CoolLight. The 48 LEDs used in previous model has been replaced by 5W LED module.

Main advantages and characteristics:

- increased light intensity
- very low power consumption only 5W
- even light distribution
- compatible with the same electronics (130299, 130300)
- unchanged external and mounting dimensions (identical external brass chrome plated cover)
- long lifetime up to 50000 service hours
- waterproof design for installation in wet conditions even under water
- external surface remains cool during operation

## Better but cheaper!

**130311** Light CoolLight, LED module 5W, white light, brass+chrome

**119,- EUR (VAT excl.)**
