

## Ozone generator

### What is ozone

Ozone is natural cleansing and disinfecting substance (oxidizing reagent), which is reacting with the organic substances, liquidates bacteria and viruses. In the combination with the sanitary cleaners intended for the whirlpools always guarantees a pure water. By using the Ozone generator you will reduce the usage of the sanitary cleaners.

### How does it work

O<sub>3</sub> molecule, which originates by the ozone discharge is injected to the water of the filter circle. From the filter circle is carried to the whirlpool, where finds the germs of viruses, bacteria and another organic substances that destroys with the oxidation. It brings the enjoyment from the high-quality water without edgy eyes, dried skin and lather.

### Benefits of the ozone

- reduces bacteria, eliminates yeasts and germs of the bacilli, deactivates viruses and moulds
- oxidates and liquidates smear and another impurities in the water
- pH neutral, doesn't contaminate the water
- doesn't leave the unpleasant chemical smell in the water
- doesn't need the ideal parameters for its use in the water like the other chemical preparations.

### Technical specifications

250mg/hour, 230V/50Hz, 0,08A, IPX5
