

Accessories for pools, massage pools, saunas, salt caves, steam cabins, interiors, exteriors, entrance halls

LED COLOUR LIGHTING

Independent colour LED

An interesting LED waterproof lighting is intended for multipurpose use not only for massage pools and steam cabins, but also for interiors, exteriors and more ... The significant advantage is, that the LED can be exchanged from forehead, e.g. at a colour lighting of a steam cabin from inside the cabin, (at lights in ceiling, stools/benches or walls). If the LED lighting is installed in a pool, the exchange can be performed when water level is decreased to enable it from inside the pool (or a massage pool). This lighting can be an interesting supplement even for interiors (e.g. hotel entrance halls, wellness centres and pools surroundings) and because this is a water-proof lighting, also exterior use in gardens etc. is possible. Another advantage of the device is a minimum current consumption with **the possibility of forehead LED exchange.**

The forehead exchangeable LED

The above mentioned colour LED with accessories is being made in two versions.

A) with a 3m connective cable, i.e.

code 130407 Spot chromotherapy-point of light single RGB LED 17.31 €

B) with a 5m connective cable, i.e.

code: 130408 Spot chromotherapy-point of light single RGB LED 21.24 €
