

U56T electronic control for pools and whirlpools

Like most our electronics, also type U56T is characterized by dependence of its behaviour on the program recorded in the microprocessor. The general functionality of the electronics can be easily re-programmed according to customer's wish. This electronics has 5 inputs (with independent contact indication), where the control buttons are connected, and 6 outputs at 230V (2x max. 16A, 2x max. 8A, 2x max. 4A, where up to 6 appliances may be connected).

Program 1) 1x double-speed pump (2 outputs), 1x pump, 1x compressor, 1x heating, 1x lighting.

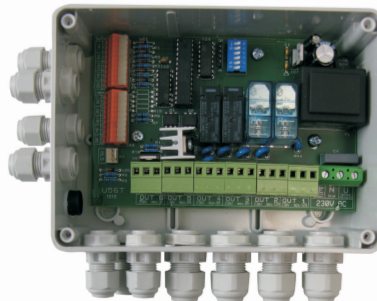

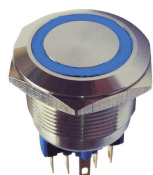

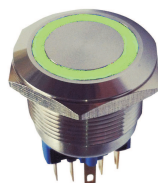

Program 2) 2x double-speed pump (4 outputs), 1x light, 1x heating, It is possible to set the automatic sluice cycle swithing-on all the pumps and the compressor in the pre-set timing

Remark: applicable for both programs, all devices can be switched off after 20 minutes of running.

Recommended accessories U56T stainless steel buttons

Stainless steel buttons 5A/250V with LED backlight in green or blue colour, outer diameter of the button thread is 22mm, the buttons are resistant against vandalism.

A reliable product, troublefree service.
