

V1TI Electronic control for SPA or pool

Upon requirements of our customers we have developed a simplified version of electronics U56T, electronic control of a spa or a pool. It is a cheaper electronics, for controlling of one function of the spa, or one of pool attractions. The electronics contains also connective cable between the electronics and the control button. As accessories we offer a stainless steel button with round backlight in green or blue hue, lighting while pressing the button. Moreover, the electronics V1TI can, except switching of one function for the spa or pool, check the water level through the capacitive, i.e. level sensor.

Note: The capacitive sensor does not require any boring of the hull of the spa or pool, works contactless through non-conducting materials.

Recommended accessories a stainless steel button.

Stainless steel buttons with LED backlight in green or blue colour, outer diameter of button thread is 22 mm, the buttons are resistant against vandalism

A reliable product, troublefree service
