

## Waterproof adjustable dosing of solution

Waterproof adjustable dosing of solution is device designed for automatic dosing of various chemicals such as ferric sulfate in wastewater treatment plants. The advantage is the possibility of placing a wet environment. Set the desired daily dose is done on the switch inside the device. Dispenser must be closed after setting or sealed and thereby it is prevented of interference in setting an unauthorized person. The first dose is after connecting the power supply - it is also a functional check device.

- IP-66
- dosing peristaltic pump 230V/50 Hz
- adjustable daily dose 25-1600 ml
- daily dosing interval after 4 hours

**Areliable product, troublefree service.**
