

Blower SAC400

Blower SAC400 is a more advanced successor of successful model SAB400. Unlike the prior model line SAC400 has more compact dimensions and lower weight almost by half.

One of the main requirements, requested at the new model, was to minimize the noise level (72dB) while keeping the power characteristics of the previous model. Our development team solved this task excellently.

150180 Blower SAC400, 400W, 230V/50Hz N=23 000 rev/min
