

## Scalebuster

Warranted way of protecting Your whirlpool or other home appliances from scale. The size of the cartridge gives the total water flow and thereby the number of connected nodes. Thanks to Scalebuster the life time of all appliances at Your home will increase. You also save a lot of time formerly attended to maintenance of bathroom. No chemistry! Zinc cartridge only changes the crystalline grating of calcium in water and the chemical composition remains unchanged although scale does not stick to the surfaces.

The product is intended for private use as well as for demanding public or industrial operating.
